

Introduction to the Kosmos Auction System

Kosmos is a cloud based online trading system that, unlike the current ATS, is not tied to specific hardware, such as your bidding desks, or dedicated software that only runs on a Windows PC. As the whole system is designed to be used in a web browser (Chrome), it can be accessed from any device that supports Chrome and you are bidding within Australia.

The essence of the trading system remains unchanged. We will still be selling most of our product via Dutch Auction on clocks that tick down the price until a bid is placed. High value product will still be sold as a bid-up (multi) auction as it is now. You will still login with a buyer account and have access to sub-accounts to bid on behalf of. Our backend system AAS and our internal Market Floor Operations will remain unchanged at this time.

Initially it is our auctioneers and remote buyers who will most notice the changes as the current software they use will no longer be supported and they will have to migrate to Kosmos. The onsite buyers will, for the short term, still be interacting with the auction as they do now. It is important to note however, that there will NOT be bidding terminals in the new SFM and all buyers will ultimately be using the web version of Kosmos.

Using Kosmos

So what does it look like? The first thing you will need to do is access the web page at <https://auction.sydfish.com> and login. This is the equivalent of logging into your bidding desk or remote buyer software as you do now but you will be logging into a web site not an application or bidding terminal. We still need to know who you are so we can get you the fish you are buying.

The screenshot shows the login interface of the Sydney Fish Market Auction system. The browser's address bar displays 'auction.sydfish.com/#/core/login'. The page features a green header with the 'SYDNEY FISH MARKET' logo and a sidebar on the left with links for 'Login', 'Register', and 'Privacy Statement'. The main content area includes a login form with 'Email' and 'Password' input fields, a 'LOG IN' button, and links for 'Not yet registered? Click here to request an account' and 'Forgot password? Click here to recover'.

Login Screen

Your initial login details will be similar to what you currently use, with the addition of “Syd@” in front of your pin-code for the password. So if your login was 999982 and you have the pin-code 9123 it will still be 999982 in the ‘Email’ or ‘Username’ field and Syd@9123 in the password field.

Once you have logged in you will be asked to chose your Auction (yes we know there is only one to choose from 😊) .

The screenshot shows the 'Buyer clocks overview' page after logging in. The browser's address bar displays 'syd.kosmos-test.auccis.com/#/buyer/clocks/5421'. The page features a green header with the 'SYDNEY FISH MARKET' logo and a sidebar on the left with links for 'Users', 'Supply monitor', 'Supply matrix', 'Transaction monitor', 'Shopping lists', 'Auction', 'Reporting', and 'Privacy Statement'. The main content area displays a table with columns for 'Auction Cluster', 'Product name', and 'Product description'. The table shows one row with 'Sydney Fish Market' and 'Fish'. Below the table is a 'Create Filter' button and a pagination bar showing '1 Items'.

Auction Selection

Selecting Sydney Fish Market will open a new tab with your clock window.

This window can take many forms depending on the 'widgets' you choose to display. It is possible to have one window that can toggle between all three clocks, or you can have all 3 clocks show in one window.

Multi Clock view

Regardless of which view you are currently using the bidding keys for the clock are displayed at the top of the screen. When using single clock view the same keys are used for the currently selected clock, however in multi-clock view there are different keys for each clock.

Choosing the quantity of crates you want when you stop the clock on a lot with multiple boxes, just like the current system, you will by default get one crate. If you want more than one you will have the option to enter a value up to the maximum allowed for that sale.

Confirm sale

Time left: 1s

Price: 8.35

CRATES	KGS	AMOUNT	SUBBUYER
2	17.00	2	
		2	0 - 207551
		1	0 - 207551

Total amount:

2.00

Total weight:

34.00

Total price:

283.90

CONFIRM

Confirm Sale dialog

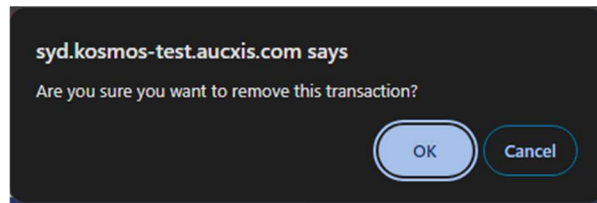

Alternately you may configure predefined keys for buying set quantities of crates, the options are: 2 thru 5 or All. All is the maximum number allowed for that lot or the remainder. When you bid with those keys you will not get the confirmation dialog.

Reviewing your Transactions:

There is a list of your current transactions that you can scroll through to review your purchases for today. At the right hand side of the list you will notice that there is a 'bin' icon this allows you to request a transaction to be cancelled if you have bid in error.

TRANSACTIONS - A										
AUCTION	LOT	KG	CRATES	SUPPLIER	SPECIES	PROCESS	SIZE	QUALITY	SUBBUYER	PRICE
0020	9051	20.00		5 Coffs Harbour Co-operative	Octopus				260725	24.15
0020	9050	7.00		1 Coffs Harbour Co-operative	Snapper	IW	Small		260725	24.52
0020	9049	16.00		1 Coffs Harbour Co-operative	Kingfish Yellowtail	IW	Medium		260725	24.37
0020	9049	16.00		1 Coffs Harbour Co-operative	Kingfish Yellowtail	IW	Medium		260725	24.30
										3,365.36

You will be prompted to confirm your decision to request a cancellation.

Please note that this is NOT an automatic cancellation it simply sends a request to the auctioneer on that clock that you would like to cancel. The auctioneer will decide if that is allowed, it also dependant on that request being received before the transaction has been finalised. It is up to you to ensure you make such requests as soon as possible. Once a transaction has been finalised or the auction finished you will not see the bin icon and will not be able to request cancellation. Normal SFM procedures for sale amendments still apply if you need to use them.

If your transaction is cancelled you will see it show in the list with a red line trough it and the totals at the bottom of the list will have been adjusted accordingly.
